FLUID MILK AND CREAM REPORT
JANUARY 1958

9
345M
Fluid milk prices in early January showed varied changes among the principal markets, tending to be slightly lower at producer levels but generally unchanged at resale, the Agricultural Marketing Service reported today. Dealers' buying prices for milk for fluid use decreased in 20 markets or about 1 out of every 8 reporting. Buying prices increased in 9 markets or about 1 out of every 18 markets. On the retail side, home delivery prices showed significant increases in 12 markets, but decreased in a like number which is about 1 out of 13 markets reporting. However, dealers' buying prices are not currently determined in a number of markets and there may be further changes in January prices which will be shown in the February 1958 report.

The average price per single quart of standard grade milk delivered to homes in 25 major markets in early January was 25.5 cents, equaling the December 1957 average but 0.8 cents higher than in January 1957. Among the 25 markets, home delivered prices increased one-half cent per quart from December in Louisville and 1 cent both in Pittsburgh and Jacksonville. The only decrease reported was in Boston, where prices dropped 1 cent per quart. Compared with January 1957, current prices for milk delivered to homes are higher in 18 of the 25 markets.

Dealers' buying prices for milk purchased for fluid use in January 1958 in principal markets over the United States averaged \$5.58 per hundredweight. This was 11 cents below December, but was 1 cent higher than the January 1957 average. The 11-cent decline from December to January is about usual for this period.

In the New England region, dealers' buying prices for milk for fluid use in early January averaged \$6.38 per hundredweight. This was 47 cents below December and 8 cents under the January 1957 average. In the 4 New Hampshire markets reporting and the 5 Federal Order Markets of Massachusetts, the prices dealers were paying for Class I milk dropped 66 cents from December. Retail prices declined $1\frac{1}{2}$ cents per quart for both home delivered and store purchased milk in the New Hampshire markets. In Boston, Fall River, Springfield, and Worcester, prices at retail declined 1 cent per quart and in Lowell-Lawrence retail prices were 1 to $1\frac{1}{2}$ cents per quart lower. In the Bellows Falls and Burlington, Vt. markets, retail prices declined 1 cent per quart. Producer prices are not currently determined in these markets.

(Continued on page 18)

SPECIAL NOTICE

We call your attention to several significant changes and additions which have been made in this report. Selling prices for additional fluid milk and cream items are included for the first time in Table 1 and the "Special Grades" Table 5. Selling prices are included for both "creamline or regular" milk and the most common grade in the market whenever reported. Much information previously carried in the footnotes to Table 1 is now incorporated into Tables 1, 1(a) and 1(b).

S Where State is marked "S", all cities are under State Control Board.

S** Producer price only under State control.

F Where State is marked "F", all cities shown are under Federal Order.

D.R. Payment is in direct ratio to milkfat content.

a. Class or base price unless otherwise noted. Bulk tank premiums appear in table 1(b).

b. List prices subject to discounts.

d. December price; at Manchester, \$3.22.

e. CHICAGO: 55-70 mile zone; NEW ORLEANS: 61-70 mile zone.

f. Flat price.

g. 200-mile zone price plus estimated freight (31½-41¢) and country station handling charges (20-50¢).

h. Negotiated prices. The F.O.M. price is shown in table 1(a).

j. Includes following service charge for first unit only each single delivery:

BUFFALO, LOS ANGELES, 5¢; FRESNO and SAN FRANCISCO, 3¢; SACRAMENTO, 4¢.

k. Plus an average 40¢ per cwt. quality premium.

p. Second half-gallon: Boston, 51¢; Fall River, 6-10¢ less; Springfield, 48¢; Worcester, 51¢; Alton, 41¢; Green Bay, 38¢; Detroit, 42¢ over 5 half gallon per month; Milwaukee 41¢.

r. The most common grade of milk not reported; prices shown are for Homogenized Vitamin D milk.

t. In paper container.

u. F.O.M. price.

v. In glass container.

Table 2.-Dealers' weighted average buying prices (f.o.b. city) for standard grade milk for distribution as milk, United States, by regions, January 1958, with comparisons 1/

(Per hundredweight - 3.5% fat; weighted by population of individual markets)

Omaha, Nebr.....	21.0	22	22	22	25 cities average..	23.2	24.7	3/25.5	25.5

1/ "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

3/ Revised.

3/ Includes 58¢ payback.

4/ Includes 40.3¢ per cwt. average quality premium.

5/ Base price; surplus price \$2.73.

Early January Class I buying prices in the Middle Atlantic region averaged \$6.39 per hundredweight, a 20-cent decrease from December, but 12 cents above the average for January last year. In the Albany, Binghamton, New York City, Schenectady, Syracuse and Northeastern New Jersey markets -- all under the New York-New Jersey marketing area, Class I prices dropped 27 cents per hundredweight. In the New York markets quoted, both home delivered and store prices were generally unchanged from a month earlier. In the Northeastern New Jersey portion of the area home delivered prices were down one-half cent per quart. Information on store prices had not been received at time of publication. In Pennsylvania, Class I prices increased 14 and 20 cents per hundredweight in the Pittsburgh and Erie markets, respectively. Retail prices were up 1 cent per quart for both home delivered and store purchased milk in the two markets. In the Harrisburg and Johnstown markets, advances of 40 cents per hundredweight were accompanied by increases of $1\frac{1}{2}$ cents per quart at retail.

Dealers' buying prices for milk for fluid use in the East North Central area in early January averaged \$4.54 per hundredweight, 9 and 3 cents below the December 1957 and January 1957 averages, respectively. In the Cleveland, Akron, Canton, and Cincinnati, Ohio markets, previously negotiated premiums above the Federal Order minimum price expired in December. It is reported that in the Cleveland and Canton markets, producer associations have negotiated a 30-cent premium for January. Retail prices in all the Ohio markets reporting are unchanged from early December. Class I prices were down 10 cents per hundredweight from December in the South Bend market, while retail prices remained unchanged. In the important Chicago, Ill. marketing area, the negotiated Class I price of \$4.15 continued in effect in early January. Retail prices were generally steady in this market. In the Springfield, Ill. market, Class I prices advanced 15 cents per hundredweight. Retail prices remained unchanged from the previous month. In the Battle Creek, Mich. market, retail prices increased 1 cent per quart in early January. Producer prices in this market remained practically unchanged.

In the West North Central region, prices dealers were paying for milk for fluid use in early January averaged \$4.31 per hundredweight, unchanged from December but 3 cents below January last year. Among the major markets in this area, prices at both producer and retail levels were fairly stable. Dealers' buying prices for milk for fluid use increased 10 cents in Winona, Minn. and dropped 8 and 19 cents per hundredweight, respectively, in the Des Moines and Burlington, Iowa markets. Retail prices were unchanged in these markets. In the Topeka, Kans. market, retail prices were unstable during December due to a local milk price war. Quart prices did not change, but half-gallon and gallon prices dropped quite sharply.

Early January dealers' buying prices for Class I milk in the South Atlantic region averaged \$6.49 per hundredweight, 3 cents above December and 20 cents higher than the January 1957 average. Prices at the Wilmington, Del. market dropped 40 cents per hundredweight for Class I milk and 1 cent per quart for milk delivered to homes. Store prices were not reported for this market. In the 5 Georgia markets included in the report, Class I prices advanced 27 cents per hundredweight above December and retail prices increased 1 cent per quart for milk delivered to home or purchased in stores. In Jacksonville, Fla. home delivered prices increased 1 cent per quart. Store prices were not reported at the time of this publication. Producer prices were unchanged from December.

In the East South Central region, Class I prices in early January averaged \$5.18 per hundredweight, 1 and 5 cents, respectively, below December 1957 and January a year ago. Louisville, Ky. retail prices increased one-half cent per quart during December for milk delivered to homes and sold in stores. Producer prices were practically unchanged from a month earlier. Prices in the Birmingham market decreased 10 cents per hundredweight at Class I and 1 cent per quart at retail.

Dealers' buying prices for Class I milk in the West South Central region averaged \$5.66 per hundredweight. This was 2 cents above December but 36cents below January 1957. Among the principal markets in this area, retail prices were generally unchanged from December. Changes in Class I prices included increases of 7 cents in New Orleans and 6 cents in Austin and Dallas. On the other hand, Little Rock Class I prices dropped 15 cents per hundredweight while Oklahoma City and Tulsa showed a 6-cent decline.

In the principal markets of the Mountain and Pacific regions, dealers' buying prices for milk for fluid use and prices consumers were paying for whole milk in early January were generally unchanged from a month earlier. In the Mountain region, Class I prices averaged \$5.74 per hundredweight, equaling the December average, but 3 cents below January 1957. In the Pacific Coast States, Class I prices averaged \$5.31 - unchanged from December and only 1 cent above January last year.

SALES OF WHOLE MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
MARKETING AREAS UNDER FEDERAL ORDERS, NOVEMBER 1957

Whole milk sales show small increases

Average daily sales of whole milk during November 1957 in 34 Federal Order markets, with data available on in-area sales, were 1.5 percent larger than in November 1956, the Agricultural Marketing Service reports. Sales advanced 1.1 percent from October to November, compared with a usual small decline during this period. Over half of the 34 markets reported higher whole milk sales in November than in October with increases generally from 1 to 3 percent. Of the 7 markets showing lower sales in November, 4 reported 1 percent declines. Nine markets reported sales about unchanged.

Compared with a year earlier, November 1957 whole milk sales were up from 1 to 7 percent in 21 markets, unchanged in 5 and down generally from 1 to 8 percent in 8 markets. The average milkfat test of whole milk sold in November in these markets was 3.57 percent, about the same as in both October 1957 and November 1956. Among the markets, the average test of sales ranged from 3.32 to 3.79 percent milkfat. In the first 11 months of 1957, cumulative whole milk sales in the 34 markets were 2.2 percent above January-November 1956.

Skim sales decline seasonally

Sales of skim milk products on an average daily basis during November in 34 Federal Order Markets were down 3.6 percent from October but were 5.2 percent above November 1956. All markets but 6 reported November skim sales below a month earlier with declines of as much as 15 percent. However, sales were above a year earlier in 23 markets with substantial increases in many markets. In the other 11 markets, 10 reported decreases generally from 1 to 14 percent with sales in the other market practically unchanged from November 1956. The average test of skim products sold in November was 1.60 percent, compared with 1.66 percent in October and 1.58 percent a year earlier. In the period January-November 1957, cumulative daily sales of skim products in these 34 markets were 5.6 percent above the same period in 1956. Twenty-eight markets showed sales higher in the first 11 months of 1957 than a year earlier.

Half-and-half sales up sharply from October

Sales of milk and cream mixtures (commonly known as half-and-half) during November in 29 Federal Order markets with data segregated to exclude out-of-area sales were 16 percent above October. All 29 markets showed higher sales with several markets recording very sharp increases. Compared with November 1956, average daily sales of half-and-half in the 29 markets were 4.3 percent higher. Twenty markets reported sales higher than a year earlier. Six markets reported decreases of as much as one-fifth and 3 showed sales unchanged. The average milkfat test of mixtures sold during November was 11.4 percent, unchanged from a year earlier but below the 11.8 percent average for October.

1/ Quantity includes plain and fortified skim and part skim milk, buttermilk and cultured specialties, and flavored milk and milk drinks sold within the marketing area; includes all markets for which in-area data are segregated to include no significant quantities of out-of-area sales.

2/ Revised.

3/ Preliminary.

4/ Computed from unrounded data.

5/ Excludes all Massachusetts markets.

Compiled by the Standardization and Program Development Branch, Dairy Division, from reports of Market Administrators.

In the first 11 months of 1957, half-and-half sales were up 4.8 percent from the January-November 1956 cumulative average.

Fluid cream sales continue below previous year

Daily sales of fluid cream products in November in 30 Federal Order markets showed a 14.4 percent seasonal increase over October, but a 6.0 percent decrease from the November 1956 level. Sales were above the previous month in all markets with a number of markets showing increases of over a third. However, compared with November a year earlier, sales were down in 19 markets, unchanged in 2 and up in the other 9. The milkfat content of fluid cream products in November averaged 23.6 percent. Cumulative daily sales of fluid cream in the 30 markets in the period January-November 1957 were 6.3 percent below the first 11 months of 1956.

Combined sales of fluid products exceed November 1956

In the 29 markets having data on in-area sales of all fluid milk products, the combined total sales in November were 2.0 percent above November 1956 on a product pound basis and 1.2 percent higher in terms of pounds of milkfat. The average milkfat test of all fluid products sold in November 1957 was 3.84 percent as compared with 3.87 percent a year earlier. Receipts of producer milk in these 29 markets during November were 2.8 percent above a year earlier. In the first 11 months of 1957, cumulative sales of all fluid products in the 29 markets were 2.4 percent above the January-November 1956 total.

Milk receipts in Federal Order markets down seasonally

Receipts of producer milk at 60 Federal Order markets in November averaged 62.4 million pounds daily or a total of 1.87 billion pounds for the month. Daily receipts during November were down 2.0 percent from October, but up 3.2 percent from November 1956. The average test of November receipts was 3.85 percent milkfat, unchanged from a year earlier, but slightly higher than the October average of 3.81 percent. Receipts per producer averaged 481 pounds or almost 56 gallons daily during November, slightly below the October average but 6 percent above the November 1956 average.

1957 U. S. milk production sets new high

Milk production on farms totaled 9,384 million pounds in December 1957, exceeding the record high of the previous December by nearly 2 percent and the 1946-55 average for the month by 14 percent. Production increased 7 percent from November to December compared with a seasonal gain of 6 percent last year and an average increase of 4 percent for the period. The total quantity produced in December was sufficient to provide 1.75 pounds of milk daily to each person in the United States. This was slightly less than for December 1956, but was 2 percent more than the average for the month. The sum of the 12 monthly milk production estimates made in 1957 was 127.0 billion pounds, or 1 percent more than the previous record high annual production of 125.7 billion pounds in 1956. This calculated annual total production is tentative pending a more detailed analysis of numbers of milk cows and production per cow by States.

FLUID MILK AND CREAM REPORT
FEBRUARY 1958

February 20, 1958

Fluid milk prices in early February were unchanged to slightly lower at both producer and consumer levels, the Agricultural Marketing Service reported today. Producer prices declined in 9 markets or about 1 out of every 18 markets reporting. Prices consumers were paying for milk delivered to homes were also down from January in 9 markets. On the other hand, February home delivery prices were higher in only 2 markets. Of the 160 markets covered by the report none showed significant increases in dealers' buying prices for milk for fluid use. However, Class I prices are not currently determined in a number of markets and there may be further changes in February prices which will be shown in the March 1958 report.

Dealers' buying prices for milk for fluid use in principal markets nationally averaged \$5.59 per hundredweight in February 1958. This was 7 cents above February 1957 and 14 cents above 1952-56 average for the month. Prices continued their seasonal downward movement in February as the average dropped 2 cents below January which is somewhat less than the usual decline of 5 cents in this period.

The average price per single quart of standard grade milk delivered to homes in 25 principal cities in early February 1958 was 25.5 cents-- unchanged from the January average. The current average was 0.8 cent above February 1957 and 2.4 cents above the 1952-56 average for the month. Among the 25 markets, Hartford, Connecticut reported a 1-cent decrease for milk delivered to homes and Dallas, Texas, a 1-cent per quart increase.

In the New England region, the average price paid by dealers for Class I milk, at \$6.33 per hundredweight, was 5 cents below January but 3 cents above February last year. Store prices in Burlington, Vt. were as much as 2 cents per quart lower and home delivery prices were down 1 to 1½ cents. Producer prices in this market are not currently determined. Class I prices in the Connecticut markets were 44 cents per hundredweight lower. Retail prices dropped 1 cent per quart for milk delivered to homes and sold in stores in New Haven. In the Hartford, Conn. market, home delivered prices were down 1 cent and store prices 2 cents per quart.

Early February dealers' buying prices for Class I milk in the Middle Atlantic region averaged \$6.36 per hundredweight, 4 cents below January but 15 cents above the February 1957 average. Among the major markets in the region, the only price changes were decreases of 13 cents per hundredweight in the New York-New Jersey Metropolitan area. Retail prices in these markets were generally unchanged with

S Where State is marked "S", all cities are under State Control Board.

S** Producer price only under State control.

F Where State is marked "F", all cities shown are under Federal Order.

D.R. Payment is in direct ratio to milkfat content.

a. Class or base price unless otherwise noted: Bulk tank premiums appear in table 1(b), in Jan. 1958 report

b. List prices subject to discounts.

d. January price; at Manchester, \$3.20

e. NEW YORK-NEW JERSEY: 200-mile zone price plus estimated freight (31½-41¢) and country station handling charges (20-50¢). CHICAGO: 55-70 mile zone; NEW ORLEANS: 61-70 mile zone.

f. Flat price.

h. Negotiated prices. The F.O.M. price is shown in table 1(a).

j. Includes following service charge for first unit only each single delivery:

BUFFALO, LOS ANGELES, 5¢; FRESNO and SAN FRANCISCO, 3¢; SACRAMENTO, 4¢.

k. Plus an average 40¢ per cwt. quality premium.

p. Second half-gallon: Boston, 51¢; Fall River, 6-10¢ less; Springfield, 48¢; Worcester, 51¢; Alton, 41¢; Green Bay, 38¢; Detroit, 42¢ over 5 half gallon per month; Milwaukee 41¢.

r. The most common grade of milk not reported; prices shown are for Homogenized Vitamin D milk.

t. In paper container.

v. In glass container.

x. Negotiated December '57 Class I \$4.88

y. Change from January price represents difference in grade of milk reported.

z. Reported January price incorrect for grade shown. Should have been the same as currently reported.

Table 2.--Dealers' weighted average buying prices (f.o.b. city) for standard grade milk for distribution as milk, United States, by regions, February 1958 1/

(Per hundredweight - 3.5% fat; weighted by population of individual markets)

Region	Markets	February 1957	January 1958	February 1958	
				Range	Average
	Number	Dollars	Dollars	Dollars	Dollars

1/ "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

Table 4.--Fluid milk prices in markets having price changes
between January and February 1958

(Changes effective February 1)

Markets	Dealers' buying prices for milk for fluid use 3.5% fat (f.o.b. city)		Prices per single quart paid by consumers for the most common grade of whole milk

1/ Prices usually specified as follows:

- Class I - Milk for fluid consumption.
- Class II - Milk from which cream is obtained for fluid consumption.
- Class III - Milk used in manufactured dairy and IV products.

2/ F.O.B. CITY unless indicated otherwise.

3/ Includes 40.3¢ per cwt. average quality premium.

4/ Base price; surplus price \$2.73.

the exception of New York City where the store price range widened, dropping one cent on the low side and increasing $1\frac{1}{2}$ cents on the high side. Home delivered prices were reportedly the same as in January.

Prices dealers were paying for milk for fluid use in February in the East North Central region averaged \$4.50 per hundredweight, down 4 cents from January but practically unchanged from the February 1957 average. In this area, February dealers' buying prices in markets with currently determined Class I prices were unchanged or showed only small changes from January. In the Cleveland and Akron-Stark County, Ohio markets, negotiated premiums above Federal Order minimum prices of 30 cents per hundredweight effective in January were increased to 60 cents in February. In the Dayton-Springfield, Ohio market, which had a 20 cent negotiated premium for January, the exact status of premium negotiations for February are not yet known. On the retail side, February store prices dropped 1 cent in the Cincinnati market but home delivery prices were unchanged. Retail prices in the Toledo, Ohio market were down 1 cent for home delivered milk but unchanged at stores. In the Evansville, Ind. and Rock Island, Ill. markets, prices consumers were paying in early February were down 1 cent for both home delivered and store sales. In Rock Island, a milk price war started on January 27 but prices had apparently stabilized by February 4 at 1 cent per quart below early January levels. In the Grand Rapids, Mich. market, retail prices dropped $\frac{1}{2}$ cent per quart for home delivered milk and 1 cent in stores.

In the West North Central region, dealers' buying prices for milk for fluid use in early February averaged \$4.32 per hundredweight, slightly above the January 1958 and February 1957 averages of \$4.31 per hundredweight. In Burlington, Iowa, fluid milk prices increased 1 cent per quart at retail and 6 cents per hundredweight at the producer level. Lincoln, Nebraska retail prices decreased 1 cent for both home delivered and store purchased milk. Producer prices are not currently determined in this market. In the Springfield, Mo. market, store prices advanced 1 cent per quart while home delivered prices remained unchanged. Producer prices showed a 3 cent per hundredweight increase.

Prices dealers were paying producers for Class I milk in the South Atlantic region in early February averaged \$6.47 per hundredweight -- 1 cent below January but 19 cents above February 1957. Among the principal markets in this area, prices at retail dropped 1 cent per quart in Huntington, West Va. Producer prices are not currently determined in this market. The Class I price dropped 53 cents per hundredweight below January in Wheeling, West Va. Retail prices were reportedly unchanged.

In the East South Central region, Class I prices averaged \$5.17 per hundredweight, 1 and 3 cents below the January 1958 and February 1957 averages, respectively. Paducah, Kentucky reported a milk price war in effect in early February with prices at retail very unstable. Class I prices in this market were down only 2 cents from a month earlier. Class I prices at Knoxville, Tenn. increased 6 cents per hundredweight while Nashville, Tenn. reported a 6 cent per hundredweight drop from January. Retail prices were unchanged in both markets.

Prices dealers were paying producers for Class I milk in the West South Central region averaged \$5.67 per hundredweight -- about the same as the January average but 34 cents below February last year. Among the principal markets in

SALES OF WHOLE MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
MARKETING AREAS UNDER FEDERAL ORDERS, DECEMBER 1957

Whole milk sales decline seasonally

Average daily sales of whole milk during December in 34 Federal Order markets with data segregated to exclude out-of-area sales, were 0.8 percent above December 1956, the Agricultural Marketing Service reports. December sales showed varied trends from a year earlier. Increases occurred in 16 markets generally ranging from 1 to 13 percent but 4 markets reported sales about the same as in December 1956. In the other 14 markets, sales dropped as much as 7 percent below a year earlier. Seasonally, daily sales of whole milk during December declined 4.5 percent from November, compared with a decline of 3.8 percent in the same period in 1956. Of the 34 markets, sales were down from November in all but the North Texas market which showed a 4-percent increase. During December, Dallas, Texas milk prices were cut sharply due to a price war, apparently resulting in substantial increases in whole milk sales in that market. The average test of whole milk products sold in December 1957 in the 34 markets was 3.56 percent, practically unchanged from the 3.57 percent average reported for November 1957 and December 1956.

Skim milk sales down sharply from November

Average daily sales of skim milk products during December 1957 in the 34 Federal Order markets were 8.6 percent below November. This compares with a 7.6 percent decline from November to December in 1956. However, December 1957 skim sales rose 4.8 percent above December a year earlier - somewhat less than the increases shown in earlier months of 1957. Among the markets, December sales were down seasonally from November in all but the Minneapolis-St. Paul marketing area where a 3-percent increase was shown. Compared with a year earlier, 21 of the 34 markets recorded higher skim sales with increases ranging up to a fifth. In Boston, sales were unchanged from a year earlier and in the other 12 markets decreases of from 1 to 15 percent occurred. The average test of skim milk products sold during 1957 was 1.56 percent as compared with 1.52 and 1.60 percent in December 1956 and November 1957, respectively.

Sales of milk and cream mixtures show sharp seasonal upturn

Average daily sales of milk and cream mixtures (commonly known as half-and-half) in 29 Federal Order markets (all Massachusetts markets excluded) during December 1957 were 23 percent above the previous month. The sharp seasonal gain in half-and-half sales reflects the heavy holiday use of eggnog. Of the 29 markets, 26 showed December sales above November with most markets recording substantial gains. Despite the sharp seasonal increase, December 1957 sales fell 1.1 percent short of December 1956. Nineteen of the 29 markets showed sales below a year earlier, with the other 10 reporting higher sales. Heavier sales of eggnog brought the test of milk and cream mixtures sold in December 1957 down to 10.7 percent average as compared with 11.4 percent in November but about the same as the December 1956 average.

1/ Excludes producer-handlers who purchase no milk from other producers.

2/ Revised.

3/ Preliminary.

Compiled by the Standardization and Program Development Branch, Dairy Division, from reports of Market Administrators.

Fluid cream sales continue below a year earlier

Average daily sales of fluid cream products in 30 Federal Order markets (all Massachusetts markets except Fall River excluded) during December declined 3.8 percent from November and were 9.7 percent below the December 1956 level. Fluid cream sales were below a year earlier in all 30 markets excepting the Puget Sound marketing area where a 1-percent increase was shown. In the 29 markets showing decreases, December sales were from 3 to 52 percent below a year earlier. The average test of fluid cream products sold in December was 23.3 percent, compared with 23.2 percent in December 1956 and 23.6 percent in November 1957.

Total fluid product sales above December 1956

In the 29 markets having data on in-area sales of all fluid milk products, the combined total sales in December 1957 were 1.1 percent higher than in December 1956 on a product pound basis, but 0.1 percent lower in terms of pounds of milkfat. The average test of all fluid products sold in December 1957 was 3.86 percent, compared with 3.91 percent a year earlier. Receipts of producer milk in these 29 markets increased 3.6 percent over December 1956. Cumulative sales of all fluid products during 1957 in these markets were 2.3 percent above the 1956 annual total. The average test of all fluid products sold during the year was 3.79 percent, compared with 3.82 percent the previous year. Receipts of producer milk in these 29 markets in 1957 rose 5.9 percent from 1956.

December 1957 milk receipts show seasonal upturn

Receipts of whole milk from producers at 60 Federal Order markets during December 1957 averaged 64.8 million pounds daily or a total of 2.0 billion pounds for the month. Daily receipts during December were up 4.0 percent from November, and 3.7 percent above the December 1956 average. The average test of whole milk receipts at the 60 markets in December was 3.81 percent, compared with 3.82 percent in December 1956 and 3.85 percent in November 1957. Receipts per producer in December averaged 502 pounds or over 58.4 gallons per day. This is an increase of 31 pounds or 6.6 percent above December 1956 and 21 pounds or 4.4 percent higher than November 1957.

January 1958 milk output sets another new high

Production of milk on farms during January was estimated at 9.8 billion pounds--1 percent above January last year and 14 percent above the 1947-56 average for the month. Heavy feeding of grain and high yield per cow contributed to the new record high total output in January. Milk production in January was sufficient to provide 1.83 pounds to each person in the entire country. This compared with 1.84 pounds in January 1957 and the average of 1.79 pounds for the month.

Milk cows on farms produced 126,381 million pounds of milk in 1957 -- a record high annual production. Estimates released for the 48 individual States set production at 907 million pounds above the revised 1956 output of 125,474 million pounds. The increased milk production in 1957 was the result of a record high milk flow per cow, as the number of milk cows declined considerably from the previous year and was well below average. Production of milk was equal to 738 pounds per capita in 1957--the lowest since records were started in 1924, except for 1952 when it was 730 pounds.

ANNUAL SUMMARY 1957

Dealers' buying prices rise in 1957

The average price paid by dealers for milk for fluid use in 1957 was \$5.48 per hundredweight -- the highest annual average since 1952 and the fourth highest in the 23 years of record. During 1957, dealers' buying prices on the average were 14 cents per hundredweight above 1956 and topped the comparable 1956 monthly average in all months except May, June, and July. Seasonally, 1957 dealers' average buying prices ranged from a low of \$5.17 per hundredweight in May and June to a high of \$5.77 in November -- a difference of 60 cents per hundredweight which is a little above the usual spread between the high and low months throughout the year. Dealers' 1957 annual average buying prices for milk for fluid use ranged from \$4.31 per hundredweight in the East North Central region to \$6.32 in the South Atlantic States.

Home delivered prices also increase

Prices of standard grade milk delivered to homes in single quart units in 25 major markets over the country in 1957 averaged 24.8 cents per quart -- the highest in 4 decades of record. This was an increase of 0.8 cent per quart above the previous high established in 1956 and 2.0 cents above the 1951-55 annual average. The average of 25 cities was at record high levels throughout the entire year of 1957.

Sales of whole milk, skim milk and half-and-half increase; fluid cream decreases in 1957

Average daily sales of fluid whole milk in 34 Federal Order markets during 1957 were 2.1 percent above 1956. Whole milk sales showed varied changes from a year earlier, ranging from a decrease of 1.5 percent in June to increases of 4 and 5 percent in January and July, respectively. The average test of whole milk products sold in 1957 was 3.56 percent or about the same as in 1956.

Average daily sales of skim milk in 34 Federal Order markets during 1957 were 5.6 percent above 1956. Sales were above a year earlier in all months except June, with increases ranging up to 13.2 percent above the corresponding months of 1956. The average test of skim milk products sold was 1.54 percent as compared with 1.51 percent in 1956.

Sales of milk and cream mixtures (more commonly known as half-and-half) on a daily average basis during 1957 in 29 Federal Order markets were only 4 percent above 1956. This compares with increases over the previous year of 14 percent in 1955 and 9 percent in 1956 for a similar group of markets. The 1957 half-and-half sales excluded eggnog which was included in earlier comparisons. The average test of half-and-half products sold in 1957 was 11.8 percent, or the same as in 1956. Average daily sales of fluid cream products in 30 markets during 1957 were 6.1 percent below a year earlier. This is down sharply from the 3.4 percent decline in 1956 sales for a similar group of markets. The average test of fluid cream products sold in 1957 was 22.3 percent as compared with 22.5 in 1956.

Whole milk receipts increase substantially

Average daily receipts from producers at 60 Federal Order markets in 1957 were 5.7 percent above 1956. A total of 130,798 producers shipped milk to these 60 markets in 1957 -- 2.5 percent less than the 1956 total. Receipts per producer averaged 508 pounds -- 8.5 percent over the 1956 average.

1/ "Standard grade" is the grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

2/ In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase. Service charge effective: Minneapolis, all of the period shown prior to June 1957; San Francisco, beginning March 1957; Los Angeles beginning May 1956.

1/ Quantity sold within the marketing area; includes all markets for which reported data include no significant quantities of out-of-area sales.

2/ Excludes producer-handlers' sales estimated as follows, in thousand pounds: Appalachian, 5.3; Austin-Waco, 19.4; Fort Smith, 1.7; Kansas City, 23.5; Neosho Valley, 10.8; Oklahoma Metropolitan, 8.2; Puget Sound, 31.3; Wichita, 5.6.

3/ Revised. 4/ Preliminary. 5/ Computed from unrounded figures.

6/ Marketing area expanded November 1, 1956. 1956 and 1957 figures based on sales in old area January-October; in expanded area November-December. Comparable data for 1955 not available.

7/ Akron and Stark County marketing areas, merged February 1, 1957, combined for prior periods.

8/ 1957 data adjusted to exclude sales in Topeka and other area added by amendment of October 1, 1957.

9/ Oklahoma City and Tulsa-Muskogee marketing areas, merged and expanded May 1, 1957, combined for prior periods. Sales after merger adjusted to exclude added area.

10/ Excludes Massachusetts markets.

II/ Excludes markets for which 1955 data were not available.

Compiled by the Standardization and Program Development Branch, Dairy Division, from reports of Market Administrators.

1/ Quantity sold within the marketing area; includes all markets for which reported data include no significant quantities of out-of-area sales. Includes mixtures of milk and cream, but excluding eggnog, with milkfat content higher than whole milk and lower than the minimum for fluid cream.

2/ Revised. 3/ Preliminary. 4/ Computed from unrounded figures.

5/ Akron and Stark County marketing areas, merged February 1, 1957, combined for prior periods.

6/ 1957 data adjusted to exclude sales in Topeka and other area added by amendment of October 1, 1957.

7/ Oklahoma City and Tulsa-Muskogee marketing areas, merged and expanded May 1, 1957, combined for prior periods. Sales after merger adjusted to exclude added area.

8/ Excludes Massachusetts markets.

9/ Excludes markets for which 1955 data were not available.

Compiled by the Standardization and Program Development Branch, Dairy Division, from reports of Market Administrators.

^{1/} Excludes producer-handlers who purchase no milk from other producers.

^{2/} Revised. ^{3/} Preliminary.

^{4/} Area expanded and renamed New York-New Jersey, by amendment effective August 1, 1957.

^{5/} Area expanded and renamed North Central Ohio Area, effective July 1, 1957. Known as Lima, Ohio, prior to amendment.

^{6/} Data combined prior to mergers. Stark County, Ohio and Akron, Ohio, effective February 1, 1957; Topeka, Kansas and Kansas City, Mo.-Kansas, effective October 1, 1957; Oklahoma and Tulsa-Muskogee, Oklahoma, effective May 1, 1957.

^{7/} Excludes New York-New Jersey.

Compiled by the Standardization and Program Development Branch, Dairy Division, from reports of Market Administrators.

OFFICIAL BUSINESS

(Continued from page 18)

this area dealers' Class I buying prices were generally unchanged from January. On the retail side, store prices increased 1 to 2 cents per quart in Shreveport, La., while home delivered prices were unchanged from January. In Dallas, Texas, home delivered prices increased 1 cent per quart over the previous month. Store prices were not reported by time of publication of this report.

In the Mountain and Pacific regions, dealers' Class I buying prices averaged \$5.74 and \$5.31 per hundredweight, respectively. In both regions, the current averages were unchanged from the previous month and only slightly different from the February 1957 average. Among the principal markets in these areas February fluid milk prices at both producer and retail levels were the same as in January.

347M
FLUID MILK AND CREAM REPORT
MARCH 1958

Early March fluid milk prices declined seasonally at both the producer and consumer level, the Agricultural Marketing Service reported today. Producer prices dropped in 38 markets, which is about 1 out of every 4 markets reporting. At the same time prices for milk delivered to homes were down in 23 markets or 1 out of 7 markets reporting. Two markets reported significantly higher prices to producers and 2 other markets indicated increases in home delivery prices. However, March Class I prices have not been determined in a number of markets and there may be additional changes in producer prices which will be shown in the April 1958 report.

Prices dealers were paying producers for milk for fluid use in about 160 principal markets over the United States averaged \$5.49 per hundredweight in early March -- 8 cents above a year earlier and the 1952-56 March average. The current average is down 10 cents from February 1958 and this is slightly more than the 5-year average decline from February to March.

Prices consumers were paying for single quarts of milk delivered to homes in early March in 25 principal cities averaged 25.5 cents -- 0.1 cent below February but 0.9 cent above March 1957 and 2.4 cents above the 1952-56 average for the month. Among the 25 cities, the only changes in home delivered prices were $\frac{1}{2}$ cent per quart declines in three major markets; Boston, New York City, and Detroit.

In the New England region early March dealers' buying prices averaged \$6.10 per hundredweight - 23 cents below February but about the same as March last year. Among the principal markets included in this report, prices were down seasonally at both producer and consumer levels. Augusta and Portland, Me. and Providence and Newport, R. I. market prices declined 44 cents per hundredweight for Class I milk and 1 cent per quart for both home delivered and store purchased milk. In the 4 New Hampshire markets reporting and the 5 Massachusetts Federal Order markets, Class I prices in March were down 22 cents per hundredweight. In all these markets excepting Springfield, retail prices were about $\frac{1}{2}$ cent per quart lower. In Springfield, Mass. home delivered prices dropped $\frac{1}{2}$ to $1\frac{1}{2}$ cents per quart while store prices generally were down 1 cent per quart.

Early March dealers' buying prices in the Middle Atlantic region averaged \$6.27 per hundredweight - 9 cents below February but 10 cents above March last year. In this region, Class I prices in the New York-New Jersey marketing area decreased 15 cents per hundredweight from the February level. Retail prices

(Continued on page 18)

SPECIAL IN THIS ISSUE

Data on fluid milk and cream sales by type of product in selected Federal Order markets by quarters are shown for 1957 on pages 21 to 29. Sales data for January 1958, usually carried in this issue will appear in the next issue.

S Where State is marked "S", all cities are under State Control Board.

S** Producer price only under State Control.

F Where State is marked "F", all cities shown are under Federal Order.

D.R. Payment is in direct ratio to milkfat content.

a. Class or base price unless otherwise noted. Bulk tank premiums appear in table 1(b).

b. List prices subject to discounts. d. February price; at Manchester, \$3.18.

e. NEW YORK-NEW JERSEY: 200-mile zone price plus estimated freight (31½-41¢) and country station handling charges (20-50¢). CHICAGO: 55-70 mile zone; NEW ORLEANS: 61-70 mile zone. f. Flat price.

g. Negotiated prices. The F.O.M. price is shown in table 1(a).

h. Includes following service charge for first unit only each single delivery:

BUFFALO, LOS ANGELES, 5¢; FRESNO and SAN FRANCISCO, 3¢; SACRAMENTO, 4¢.

j. Plus an average 40¢ per cwt. quality premium.

k. Second half-gallon: Boston, 50¢; Fall River, 6-10¢ less; Springfield, 42-47¢; Worcester, 48¢; Alton, 41¢; Green Bay, 38¢; Detroit, 41¢ over 5 half gallon per month; Milwaukee 41¢.

m. In paper container. p. Pennsylvania Milk Commission price. The F.O.M. price is for 3.7 percent milk which is shown in table 1(a). q. Class I \$4.44 not \$4.97 as shown last month.

r. The most common grade of milk not reported; prices shown are for Homogenized Vitamin D milk.

s. Prices carried this month effective December 1 instead of as shown in previous reports.

t. F.O.M. price. u. Change from February price represents difference in grade of milk reported.

v. Minimum basic Class I price. Producers have option of Louisville blend price or base price.

w. Prices effective February 8 at San Diego.

Table 2.--Dealers' average buying prices for milk for
fluid milk use (f.o.b. city) United States,
by regions, March 1958 ^{1/}

(Per hundredweight - 3.5% fat; weighted by population of individual markets)

^{1/} "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

^{2/} In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

^{3/} Revised.

- Class II - Milk from which cream is obtained for fluid consumption.
- Class III - Milk used in manufactured dairy and IV products.

2/ F.O.B. CITY unless indicated otherwise.

3/ Includes 40.4¢ per cwt. average quality premium.

4/ Base price; surplus price \$2.73.

declined $\frac{1}{2}$ cent per quart for both home delivery and store sales in New York City and northeastern New Jersey but were unchanged in the remaining markets of the area. In the Rochester, N. Y. market, the paper differential on store sold milk was removed on March 1, generally effecting a 1-cent drop in store prices since practically all milk there is sold in paper containers. Home delivered and Class I prices remained unchanged from February.

In the East North Central region, dealers' buying prices averaged \$4.31 per hundredweight, 19 cents below February but 4 cents above March 1957. In the Cleveland and Akron-Stark County markets, a premium of 45 cents per hundredweight above Federal Order minimum prices has been negotiated for March. This is 15 cents below the 60-cent premium in effect in February. Among the major Ohio markets, the only change in retail prices was a $\frac{1}{2}$ cent per quart decrease in Columbus home delivered prices; store prices were unchanged. However, Class I prices in all Ohio markets shown except Dayton-Springfield are not currently determined. In Fort Wayne, Ind. special out-of-store prices have milk selling as low as 9 cents per quart, 19 cents on half gallons and 39 cents on a gallon. Home delivered prices were unchanged, while the Class I price was undetermined in this market. In the Gary, South Bend, Chicago, and Milwaukee markets, Class I prices in March were down 27 cents from February. March Class I prices in these markets include negotiated premiums of 25 cents per hundredweight above the Federal Order minimum. Chicago store prices declined $\frac{1}{2}$ to 1 cent per quart. South Bend prices dropped 1 cent to homes and 1 to 2 cents at stores. Beloit, Wisc. reported a 27-cent per hundredweight drop in Class I prices and prices at retail 1 cent per quart lower. In the Rock Island and Springfield, Ill. markets, Class I prices were down 22 and 45 cents per hundredweight, respectively. Retail prices were generally unchanged in both markets. Among the Michigan markets included in the report, Detroit prices dropped 23 cents for class I milk and $\frac{1}{2}$ cent per quart for home delivered milk and $\frac{1}{2}$ to 1 cent per quart retailed out of stores. In Kalamazoo a drop of 31 cents per hundredweight was accompanied by a decrease of 1 cent per quart at retail. In Lansing where March Class I prices are not currently determined, retail prices declined $\frac{1}{2}$ cent per quart for both home delivered and store purchased milk.

Prices dealers were paying producers for Class I milk in the West North Central region in early March averaged \$4.29 per hundredweight - 3 and 4 cents below the February 1958 and March 1957 averages, respectively. A decline of 22 cents per hundredweight in Fort Dodge, Iowa Class I prices was the only significant change in producer prices reported among the principal markets in this area. Retail prices in this market remained unchanged from February. In the Minneapolis and St. Paul, Minn. markets, retail prices for half gallon units in early March continued unsettled, however quart prices were generally the same as in February for both home delivered and store sold milk. In Springfield, Mo., home delivered prices dropped 2 cents per quart while store prices stayed unchanged. In Lincoln, Neb., retail prices increased 1 cent per quart, returning to the January level. Class I prices in this market are not currently determined.

In the South Atlantic region, March dealers' buying prices averaged \$6.47 per hundredweight, unchanged from February but 19 cents above the March 1957 level. Among the principal markets in this area, the only change in prices reported was a 17-cent per hundredweight increase in Wheeling Class I prices.

Retail prices in this market held at February levels. In Huntington, W. Va. a premium of 20 cents per hundredweight above the undetermined Federal Order minimums has been negotiated for March. This compares with a negotiated premium of 25 cents in February.

Early March dealers' buying prices for Class I milk in the East South Central region averaged \$5.10 per hundredweight, 7 cents below the previous month but slightly above March last year. In the Chattanooga and Memphis, Tenn. markets, Class I prices dropped 24 and 32 cents per hundredweight, respectively, from February. Retail prices were unchanged in Chattanooga but dropped 1 cent per quart for home delivered and store sold milk in Memphis. In the Knoxville and Nashville, Tenn. markets, Class I prices increased 12 and 6 cents per hundredweight, respectively. Class I prices in both markets included negotiated premiums of 25 and 30 cents per hundredweight above the respective Federal Order minimum prices. There were no changes in retail prices in either market. In the Jackson and Greenwood, Miss. markets, Class I prices dropped 42 cents and 25 cents per hundredweight, respectively, from February. Retail prices at Jackson were unchanged but were 1 cent per quart lower in Greenwood.

In the West South Central region, dealers prices to producer for Class I milk averaged \$5.54 per hundredweight, 4 cents under February but 4 cents above March last year. In Little Rock, Ark. prices declined 26 cents per hundredweight from the previous month for Class I milk and 1 cent per quart at retail. In the New Orleans and Shreveport, La. markets, prices dropped 16 and 43 cents per hundredweight below February for Class I milk but retail prices were unchanged for both home delivered and store sales. Class I prices at the Austin and Dallas, Texas markets declined 22 cents per hundredweight. Retail prices remained the same as in February for both markets.

In the Mountain and Pacific regions, dealers' Class I buying prices averaged \$5.74 and \$5.31 per hundredweight, respectively. In both regions, the March 1958 averages were unchanged from the previous month and only slightly different from March 1957. Among the principal markets in these areas March fluid milk prices at both producer and retail levels were about the same as in February.

SALES OF FLUID MILK AND CREAM ITEMS BY QUARTERS 1956 AND 1957 AND
RECEIPTS FROM PRODUCERS JANUARY 1958 IN CERTAIN MARKETING AREAS
UNDER FEDERAL ORDERS

1957 sales of fluid milk and cream products show varied trends from 1956

In the 29 Federal Order markets having data on in-area sales of all fluid milk products the combined total sales (product pound basis) in 1957 were 2.3 percent above 1956. By quarters during 1957, sales of all fluid products showed increases over 1956 ranging from 1 percent in the fourth quarter to 3.7 percent in the third quarter. The average test of all fluid milk products sold in these 29 markets averaged 3.78 percent milkfat as compared with 3.81 percent in 1956. Sales of whole milk in 1957 were 2.1 percent above a year earlier. Plain and special skim product sales showed the sharpest increase of all fluid products - up one-sixth from 1956. Flavored milk and drink sales in 1957 were only fractionally more than in the previous year, while buttermilk sales decreased slightly over 1 percent.

Among the cream products the sharpest change was in light cream sales which dropped 12 percent below 1956. At the same time, heavy cream sales showed only about a 1 percent decline. However, sour cream sales increased 12 percent and half-and-half, 4.4 percent. Egg nog sales in 1957 were down 2.5 percent from a year earlier.

The average test of the various fluid milk and cream products sold in these 29 markets during 1957 showed little change from 1956 for most products. However, both plain and special skim and flavored drinks had a higher test.

January 1958 Federal Order market receipts increase

Receipts of whole milk from producers at 64 Federal Order markets during January 1958 averaged 67.7 million pounds daily or a total of 2.1 billion pounds for the month. This was an increase of 2.6 percent from the December 1957 total and was 3.2 percent above January 1957. The average test of whole milk delivered by producers to these Federal Order markets in January 1958 was 3.77 percent, down from both the January 1957 and December 1957 averages.

Producers shipping milk to these markets in January 1958 delivered an average of 516 pounds per day, up 15 pounds or 3 percent from December 1957 and up 29 pounds or 6 percent from the January 1957 average daily shipment.

February 1958 milk production Nationally sets another new high

Milk production on U. S. farms in February 1958 was estimated at 9,482 million pounds, only about $\frac{1}{2}$ percent more than was produced in the same months last year, but 12 percent more than the February 1947-56 average. Production in February was sufficient to provide 1.96 pounds of milk daily to each person in the United States. This was 1 percent less than in February 1957, but 2 percent more than average for the month. Weather in the Eastern and Central sections of the country was colder than usual during February with blizzards and heavy snow covering wide areas at least part of the month. Shortage of feed in the Eastern regions and lack of housing for milk cows particularly in the Southeastern States tended to hold down milk production.

FLUID MILK AND CREAM REPORT

APRIL 1958

LIBRARY
APR 27 1958
April 17, 1958
U. S. DEPARTMENT OF AGRICULTURE

9
347M

Fluid milk prices in early April showed sharp seasonal declines at both producer and consumer levels, the Agricultural Marketing Service reported today. Producer prices were lower in 56 markets which is about 1 out of every 3 markets reporting. Home delivery prices were lower in 38 markets or about 1 out of 4 markets reporting. One market reported higher prices to producers for milk for fluid use and 4 markets showed higher prices for milk delivered to homes. However, Class I prices for April have not been determined in a number of markets and further changes may be shown in the May 1958 report.

Dealers' buying prices for milk for fluid use in about 160 markets over the United States averaged \$5.25 per hundredweight in early April - 23 cents per hundredweight lower than in March and 4 cents below April a year earlier. The decline of 23 cents from March to April may be compared with an average decline of 19 cents for the years 1952-56.

The single quart price of milk delivered to homes in early April in 25 principal cities was 25.1 cents per quart - 0.5 cent per quart higher than in April a year earlier. The April average was four-tenths cent per quart below March as compared with the average decline of 0.2 cent for this period in the 5 years 1952-56.

In the New England region Class I prices in early April averaged \$5.76 per hundredweight - 34 cents per hundredweight lower than March but 5 cents higher than April of last year. Class I prices in Augusta and Portland, Maine were 66 cents per hundredweight lower and retail prices were down by 1/2 cent per quart to homes and 1 cent per quart at stores. In New Hampshire markets, Class I prices were 44 cents per hundredweight lower while home delivery prices were unchanged and store sales were generally 1 cent per quart lower. In Vermont, retail prices were down 1 cent per quart in Burlington and 2 cents in Bellows Falls. Producer prices in these markets are not currently determined. In the 5 Federal Order markets of Mass., prices dropped 44 cents per hundredweight for Class I milk and 1 cent per quart for home delivery. Store prices were reported one-half to 1 1/2 cents lower. In Connecticut home delivered prices were from one-fourth to one-half cent per quart higher than in March as a result of new labor contracts. Store prices were unchanged from March as were dealers' buying prices.

In the Middle Atlantic States, the average Class I price in early April was \$5.92 per hundredweight--35 cents under March and 2 cents below April last year. In the markets covered by the New York-New Jersey Federal Order, Class I

S Where State is marked "S", all cities are under State Control Board.

S** Producer price only under State Control.

F Where State is marked "F", all cities shown are under Federal Order.

D.R. Payment is in direct ratio to milkfat content.

a. Class or base price unless otherwise noted. Bulk tank premiums appear in table 1(b) page 12.

b. List prices subject to discounts. d. March price; at Manchester, \$2.99

e. NEW YORK-NEW JERSEY: 200-mile zone price plus estimated freight (31½-41¢) and country station handling charges (20-50¢). CHICAGO: 55-70 mile zone; NEW ORLEANS: 61-70 mile zone. f. Flat price.

g. Negotiated prices. The F.O.M. price is shown in table 1(a).

h. Includes following service charge for first unit only each single delivery:

BUFFALO, 5¢; FRESNO and SAN FRANCISCO, 3¢; SACRAMENTO, 4¢.

j. Includes an average 40¢ per cwt. quality premium.

k. Second half-gallon: Boston, 48¢, Fall River, 6-10¢ less; Springfield, 40-46¢; Worcester, 44¢; Alton, 44¢, Green Bay, 38¢; Detroit, 40¢ over 5 half gallon per month.

m. In paper container. p. Pennsylvania Milk Commission price. The F.O.M. price is for 3.7 percent milk which is shown in table 1(a).

r. The most common grade of milk not reported; prices shown are for Homogenized Vitamin D milk.

s. Minimum basic Class I price. Producers have option of Louisville blend price or base price.

t. Homogenized. u. Negotiated price for January and February averaged \$5.81 instead of price shown.

v. F.O.M. price. w. Negotiated price \$4.54 for February.

Table 2.--Dealers' average buying prices for milk for
fluid milk use (f.o.b. city) United States,
by regions, April 1958 ^{1/}

(Per hundredweight - 3.5% fat; weighted by population of individual markets)

Region	Markets	April 1957	March 1958	April 1958

^{1/} "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

^{2/} In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

1/ Prices usually specified as follows:

Class I - Milk for fluid consumption.

Class II - Milk from which cream is obtained
for fluid consumption.

Class III - Milk used in manufactured dairy
and IV products

2/ F.O.B. CITY unless indicated otherwise.

3/ Includes 40.3¢ per cwt. average quality
premium.

4/ Base price; surplus price \$2.73.

prices were lower by 28 cents per hundredweight but retail prices were generally unchanged. Southern New Jersey reported lower prices by 40 cents per hundredweight for Class I milk and one-half cent per quart for home delivery. Store prices were unchanged in Camden but 1 cent per quart lower in Trenton. In the Pennsylvania markets included in the report, prices in Erie, Pittsburgh, Reading, and Scranton were generally down about 40 cents per hundredweight for Class I milk and 1 cent per quart at retail. Harrisburg and Johnstown reported decreases of 60 cents per hundredweight for Class I milk and $1\frac{1}{2}$ cents per quart at homes and stores. In Philadelphia, Class I prices were down 80 cents per hundredweight. Store prices in this market declined 2 cents per quart from March. However, home delivered prices were down only $1\frac{1}{2}$ cents per quart largely as a result of new labor contracts.

In the East North Central region, prices for milk for fluid use in early April averaged \$4.15 per hundredweight. This was 17 cents per hundredweight lower than March and 15 cents per hundredweight below April a year earlier. In Cleveland, Canton, and Akron, Ohio negotiated April Class I prices were 45 cents per hundredweight lower than March. In Akron and Canton retail prices were generally 1 cent per quart lower, but Cleveland home delivery prices were unchanged. Home and store prices in Evansville, Ind. were 1 cent per quart higher. Producer prices in this market are not currently determined. Springfield, Ill. prices for milk for fluid use were 15 cents per hundredweight lower but prices at retail levels were the same as a month earlier. Alton, Ill. prices were 51 cents per hundredweight lower for Class I milk, but selling prices were unchanged. Retail prices in Detroit were one-half cent per quart lower. Producer prices in this market are not currently determined. Class I prices in Grand Rapids, Mich. were 36 to 46 cents per hundredweight lower but retail prices were reported unchanged. In Lansing, Mich., home delivery prices were one-half cent per quart below March. Producer prices in this market are not currently determined. In Madison, Wis., the home delivery price was one-half cent to 1 cent per quart below March and store prices 1 cent lower. Producer prices in this market also are not currently determined.

In the West North Central area, prices dealers were paying for milk for fluid use in early April averaged \$4.08 per hundredweight, 21 cents per hundredweight below March and 3 cents per hundredweight below April of last year. Class I prices in the Greater Kansas City market were 30 cents per hundredweight below March. Retail price conditions in this market have been very unstable for several weeks and early April home delivery prices were 4 cents per quart and store prices 5 cents below quotations of a month earlier. Class I prices in St. Louis were 51 cents per hundredweight lower. Retail prices at homes and stores were not reported at time of publication of this report. Springfield, Mo. prices were 42 cents per hundredweight lower for Class I milk. However, home delivered prices had increased 1 cent per quart in mid-March following a 2 cent drop in early March. Store prices were unchanged from early March levels. Topeka, Kans. reported declines of 30 cents per hundredweight for Class I milk, 1 cent per quart for home delivery and 2 cents per quart for store sales.

In the South Atlantic region, dealers' buying prices for milk for fluid use averaged \$6.24 per hundredweight in early April. This was 15 cents per hundredweight less than March but 6 cents per hundredweight more than April a year earlier. In Wilmington, Del. and Baltimore, Md., Class I prices were

20 cents per hundredweight lower but consumer prices were generally unchanged. In the Washington, D. C. and Alexandria-Arlington, Va. markets, Class I prices were 40 cents per hundredweight lower than March and down 1 cent per quart for home delivery. Store prices also generally declined. Norfolk-Portsmouth, Va. reported Class I prices unchanged but retail prices 1 cent per quart lower. In Richmond and Roanoke, Va., Class I prices were 40 and 30 cents per hundredweight respectively below March. Retail prices in these markets were generally unchanged.

In the East South Central region, Class I prices averaged \$5.03 per hundredweight, 7 cents per hundredweight below March but 2 cents higher than April 1957. Lexington, Ky. prices were 15 cents per hundredweight below March for milk for fluid use but unchanged at homes and stores. Paducah, Ky. reported declines of 93 cents per hundredweight for Class I milk and 2 cents per quart for home delivery. Nashville, Tenn. Class I prices were 24 cents per hundredweight below March but retail prices were unchanged.

Dealers' early April buying prices for Class I milk in the West South Central region averaged \$5.53 per hundredweight, down 1 cent from March but 19 cents per hundredweight above April of last year. The most important change in this area was a contra-seasonal increase of 16 cents per hundredweight for Class I milk in New Orleans. Consumer prices were generally unchanged in this market. Fort Smith, and Little Rock, Ark. reported declines of 43 and 20 cents per hundredweight, respectively, for Class I milk. These markets reported no change in retail prices.

In the Mountain States dealers' buying prices for milk for fluid use in early April averaged \$5.74 per hundredweight--about the same as both March of this year and April a year ago. Among the principal markets there were no changes in producer and consumer prices.

In Pacific Coast States, dealers' buying prices for Class I milk averaged \$5.06 in early April. This was 25 cents per hundredweight lower than both March of this year and April of last year. Prices dropped 45 cents per hundredweight for Class I milk and 1 cent per quart at both retail to homes and store sales in Fresno, Sacramento, and San Francisco, Calif. In Los Angeles, San Diego, and Santa Barbara, Class I prices were 22 cents per hundredweight less and retail prices were down by one-half cent per quart.

1/ Includes an allowance for fluid consumption on farms not producing milk in addition to the consumption on farms where milk is produced.

2/ Revised. 3/ Preliminary.

FLUID MILK AND CREAM CONSUMPTION IN THE UNITED STATES, 1950-57

Total civilian consumption of fluid milk and cream products on a milk equivalent basis in the United States averaged 351 pounds per person in 1957 as compared with 354 pounds in 1956 according to recent estimates of the Agricultural Marketing Service. The nonfarm segment of the population consumed an average of 341 pounds -- 2 pounds per person below 1956. However, milk consumption by the farm population increased 2 pounds per person from 444 pounds in 1956 to 446 pounds in 1957.

Total consumption of milk, farm and nonfarm combined, in the United States in 1957 is estimated at 60.2 billion pounds as compared to 59.6 billion in 1956. Civilian consumption in 1957 amounted to 59.1 billion pounds -- 98 percent of the total consumption. Total consumption of all fluid milk products by the nonfarm population was estimated at 51.1 billion pounds in 1957 - an increase of 1.4 billion pounds from 1956. Total milk consumption on farms declined from 9.9 to 9.1 billion pounds from 1956 to 1957.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN MARKETING AREAS UNDER FEDERAL ORDERS, JANUARY 1958

This issue carries January 1957 and 1958 milk product sales data for 44 Federal Order markets. These are all of the markets for which data are segregated as closely as possible to reflect sales within the marketing area and which have comparable data for 1957. The important markets of New York and Kansas City have been deleted because of major area changes. The product groupings for 1958 are not entirely comparable with those used in previous years. Flavored whole milk is now classified as whole milk instead of a milk drink. Sales of eggnog and aerated cream will no longer be included in the totals of milk and cream mixtures and fluid cream items, respectively. Receipts data will be carried for the 64 markets which were under Federal Order throughout 1957.

Whole milk sales in January above a year earlier

Average daily sales of whole milk during January 1958 in 44 Federal Order markets were 1.8 percent above those of January last year, the Agricultural Marketing Service reported. Of the more important markets Boston, Philadelphia, Chicago, and Puget Sound each showed increases of 1 percent over the previous year. In Cleveland and Minneapolis-St. Paul whole milk sales were 3 percent higher while St. Louis and North Texas recorded 4 percent increases over the same month last year. The average milkfat test of sales of whole milk in 39 of the 44 markets in January was 3.57 percent as compared with 3.58 percent for January 1957.

January skim milk sales substantially above last year

Average daily sales of fluid skim milk products for the entire group of markets during January 1958 were 5.7 percent higher than for the same period last year. Sales were higher in 31 of the 44 markets with 12 markets showing increases of at least 10 percent. In one market sales were about the same but in 12 markets sales were lower than January 1957. The average milkfat test of fluid skim products during January was 1.05 percent as compared with 1.08 percent last year.

Half-and-half sales during January above January 1957

Average daily sales of milk and cream mixtures (usually known as half-and-half) during January in 43 of the 44 Federal Order markets (Worcester, Mass. excluded) were 1.8 percent higher than January last year. Of this group of markets, 31 showed increases above the same month last year. Two markets showed sales at about the same level as last year while 10 markets reported lower sales. The average test of milkfat of milk and cream mixtures in 39 of these markets during January was 11.9 percent as compared with 11.8 percent last year.

Fluid cream sales in January substantially below last year

Average daily sales of fluid cream in 39 of the 44 Federal Order markets (5 Mass. markets excluded) were 7.0 percent below January of last year. This may be compared with a 4.0 percent decrease from the previous year for a similar group of markets a year earlier. Sales were lower in 30 of the 39 markets with 20 markets reporting decreases of over 5 percent. Sales were higher in 7 markets but about the same in two. The average milkfat test of fluid cream sold in these markets was 22.2 percent for both January 1958 and January 1957.

Whole milk receipts in February above last year

Average daily receipts of whole milk from producers during February 1958 in 64 Federal Order markets were 1.3 percent higher than February 1957 and 0.9 percent above January. Daily receipts per producer averaged 523 pounds - 22 pounds or 4.4 percent higher than for February of last year and 1.4 percent above January. The average milkfat test of receipts during February was 3.76 percent as compared with 3.74 percent in February last year and 3.77 percent in January 1958.

Milk production in March slightly above a year earlier

Production of milk during March was estimated at 10.9 billion pounds - slightly more than March of last year and 10 percent above the 1947-56 average for the month. On a per capita basis, production was 2.04 pounds per person in the United States - approximately 1 percent less than both March last year and average.

FLUID MILK AND CREAM REPORT
MAY 1958

Prices of fluid milk in early May continued seasonal declines at both producer and consumer levels, the Agricultural Marketing Service reported today. Producer prices were lower in 45 markets or about 1 in every 4 markets reporting. Consumer prices were lower in 29 markets or about 1 in every 5 markets reporting. Retail prices were higher in two markets. However, in a number of markets Class I prices for May have not been determined and these changes will be shown in the report next month.

Dealers' buying prices for milk for fluid use in about 160 markets in the United States averaged \$5.14 per hundredweight. This was 11 cents per hundredweight less than April and 2 cents per hundredweight less than May 1957. Compared with April, the average was lower in all regions ranging from 1 cent per hundredweight in the South Atlantic area to 22 cents per hundredweight in New England. In comparison with a year earlier, the average ranged from a decline of 16 cents per hundredweight in the East North Central region to an increase of 12 cents per hundredweight in the West South Central.

The average single quart price of milk delivered to homes in early May in 25 major cities was 25.0 cents per quart. This is one-tenth cent per quart less than April but six-tenths cent per quart above May last year. Price declines of one-half cent per quart from April in Boston, New York City and Detroit, and 1 cent per quart in Cleveland, Milwaukee and Seattle were reported. Kansas City prices were 2 cents per quart higher. Compared with the May 1952-56 average, the price this month is 2.1 cents per quart higher.

In New England, the dealers' average Class I price in early May at \$5.54 per hundredweight was 22 cents below April and 1 cent below May last year. The four markets of New Hampshire each reported a Class I price decline of 22 cents per hundredweight and retail prices one-half cent per quart lower than April. Burlington, Vermont reported home delivery and store prices 1 cent per quart less. Producer prices in this market are not currently determined. In

S Where State is marked "S", all cities are under State Control Board.

S** Producer price only under State Control.

F Where State is marked "F", all cities shown are under Federal Order.

D.R. Payment is in direct ratio to milkfat content.

a. Class or base price unless otherwise noted. Bulk tank premiums appear in table 4 page 12.

b. List prices subject to discounts. d. April price; at Manchester, \$2.78.

e. NEW YORK-NEW JERSEY: 200-mile zone price plus estimated freight (31½-41¢) and country station handling charges (20-50¢). CHICAGO: 55-70 mile zone; NEW ORLEANS: 61-70 mile zone. f. Flat price

g. Negotiated prices. The F.O.M. prices shown in table 1(a).

h. Includes following service charge for first unit only each single delivery:

BUFFALO, LOS ANGELES, 5¢; FRESNO and SAN FRANCISCO, 3¢; SACRAMENTO, 4¢.

j. Plus an average 40¢ per cwt. quality premium.

k. Second half-gallon: Boston, 46¢, Fall River, 6-8¢ less; Springfield, 39-44¢; Worcester, 42¢;

Alton, 39¢, Green Bay, 38¢. m. In paper container. n. Creamline or regular.

p. Pennsylvania Milk Commission price. The F.O.M. price is for 3.7 percent milk which is shown in

table 1(a). r. The most common grade of milk not reported; prices shown are for Homogenized Vitamin

D milk. s. Minimum basic Class I price. Producers have option of Louisville blend price or base price.

u. Effective April 7. v. Negotiated price for March averaged \$5.82 instead of price shown.

w. F.O.M. price. t. Homogenized.

x. Negotiated price for March \$4.64.

^{1/} "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

^{2/} In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

the 5 Federal Order markets of Massachusetts, Class I prices were 22 cents per hundredweight below April and prices to consumers generally one-half cent per quart lower. Providence and Newport, Rhode Island reported Class I prices lower by 44 cents per hundredweight. Store prices were 1 cent per quart lower. The home delivery price per single quart was unchanged, but a discount plan was reported for the first time in which a 3 cent discount per quart is granted to those consumers purchasing 120 quarts or more per month.

In the Middle Atlantic States, Class I prices paid by dealers averaged \$5.73 per hundredweight--19 cents less than April but unchanged from May 1957. In the markets covered by the New York-New Jersey marketing area, Class I prices were 25 cents per hundredweight below April. Home and store prices in New York City were one-half cent per quart lower. In Northeastern New Jersey home delivery prices were one-half cent per quart lower but prices in the remainder of the marketing area were unchanged. Class I prices were 40 cents per hundredweight lower in the remaining New Jersey markets reporting. Camden and Trenton each reported home delivery and store prices 1 cent per quart lower but in Atlantic City prices were one-half cent per quart lower. For Reading, Pennsylvania, prices were less by 20 cents per hundredweight for Class I milk and one-half cent per quart to consumers.

In the East North Central region, the average buying price paid by dealers for milk for fluid use in early May was \$4.06 per hundredweight. This was 8 cents lower than April and 16 cents less than May last year. Cleveland prices were reported lower by 1 cent per quart for home delivery but unchanged at stores. Columbus prices were one-half cent per quart lower to homes and one-half to 1 cent per quart lower at stores. Producer prices in these markets are not currently determined. Dayton, Ohio Class I prices were 15 cents below April but home and store prices were unchanged. In Detroit, home delivery prices were one-half cent per quart lower. Producer prices in this market are not currently determined. Alton, Illinois reported a Class I price decrease of 12 cents per hundredweight and prices to homes and stores 1 cent lower. In Green Bay, Wisconsin, home delivery and store prices were 1 cent per quart lower. Producer prices in this market are not currently determined. Milwaukee Class I prices were 13 cents per hundredweight below April and prices at homes and stores 1 cent per quart lower.

In the West North Central area, dealers' buying prices for milk for fluid use at \$3.97 per hundredweight were 10 cents below the average for both the previous month and the same month the previous year. In the Duluth-Superior, Minnesota-Wisconsin marketing area Class I prices were 25 cents per hundredweight less than April. Single quart prices at homes were unchanged but at stores single quart prices were up to 2 cents lower and half-gallons were reported selling up to 2½ cents per quart lower than the previous month. Prices paid to producers for milk for fluid use in Burlington, Iowa were unchanged from a month earlier but were 1 cent per quart lower delivered to homes. In the Greater Kansas City marketing area, Class I prices were 11 cents per hundredweight lower but home and store prices were 2 cents per quart higher

following a settling of conditions subsequent to a price war reported last month.

In the South Atlantic region, dealers' buying prices for Class I milk in early May averaged \$6.22 per hundredweight--1 cent per hundredweight less than April but 5 cents per hundredweight above May of last year. Class I prices in Charleston, West Virginia were 35 cents per hundredweight lower and prices at homes and stores were down 1 cent per quart.

In the East South Central region, the average price paid by dealers for milk for fluid use was \$4.96 per hundredweight. This was 6 cents less than April and 4 cents lower than May last year. In Paducah, Kentucky, the Class I price was 12 cents per hundredweight lower and the home delivery price was down by 1 cent per quart. Nashville, Tennessee reported a decrease of 14 cents per hundredweight in the price for Class I milk and 1 cent per quart in the home delivery price. Store prices declined up to 1 cent per quart.

In the West South Central area, the average price for Class I milk in early May was \$5.45 per hundredweight. This was 8 cents per hundredweight less than April but 12 cents higher than May 1957. Class I prices were 20 cents per hundredweight lower in New Orleans, Louisiana and Austin, Texas, and 25 cents lower in Tulsa, Oklahoma. Selling prices in these three markets were reported unchanged.

In the Mountain States, the average dealers' buying price for milk for fluid use in early May was \$5.71 per hundredweight--3 cents per hundredweight less than April and 2 cents per hundredweight below May of last year. Class I prices decreased 15 cents per hundredweight in Phoenix and Tucson, Arizona but prices at homes and in stores were unchanged.

On the Pacific coast, the average dealers' buying price for milk for fluid use in early May was \$5.02 per hundredweight. This was 4 cents per hundredweight less than for both April this year and May last year. Compared with April, prices in Bremerton, Washington were 45 cents per hundredweight lower for Class I milk and 1 cent per quart for home delivery and out-of-store sales. In the Puget Sound marketing area a decline of 44 cents per hundredweight for Class I milk was reported. Everett, Washington prices were 1 cent per quart lower and Seattle prices were 1 cent per quart lower for home delivery and down from one-half to 1 cent per quart at stores.

Class II - Milk from which cream is obtained
for fluid consumption.

Class III - Milk used in manufactured dairy
and IV products.

2/ F.O.B. CITY unless indicated otherwise.

3/ Minus 20¢ per cwt. deducted for fall production
fund plus 40.3¢ per cwt. average quality premium.

4/ Net blend price \$5.31 and \$5.28 for February and
March.

5/ Base price; surplus price \$2.59.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
MARKETING AREAS UNDER FEDERAL ORDERS, FEBRUARY 1958

Daily sales of whole milk in 44 Federal Order markets during February averaged 1.2 percent higher than February of last year, but were 0.3 percent below January, the Agricultural Marketing Service reports. Data for these markets have been segregated to exclude out-of-area sales. February sales were higher than last year in 28 of these 44 markets, 8 of which showed increases of 5 percent or more. Sales in 8 markets were about the same as a year earlier while in 8 other markets sales were lower. Of the more important markets, Chicago, Philadelphia, and Cleveland were each 1 percent higher than February, 1957. Detroit sales were about the same. Compared with January, 22 markets reported lower sales, sales in 13 markets were about the same, but in 9 markets sales were higher. For the first 2 months of the year, sales in all 44 markets were 1.5 percent above last year. Thirty-four of the 44 markets showed higher sales, 4 markets were about the same while in 6 markets, sales were lower. The average milkfat test of whole milk sales in 39 markets (all Massachusetts markets excluded) was 3.57 percent for February -- the same average test as for both February 1957 and January 1958.

Skim milk sales during February make sizable gain over a year earlier

Average daily sales of fluid skim milk products for the entire group of markets during February were 4.8 percent higher than February last year. Of the 27 markets which reported sales above last year, 7 markets were at least 20 percent higher. In 2 markets, sales were about the same as a year earlier, but in 15 markets, sales were lower. Compared with January, sales were 2.4 percent higher. Sales were higher in 25 markets with 5 markets showing gains of at least 10 percent. Sales were about the same in 8 markets, but in 11 markets sales were lower. Cumulatively for the first 2 months of the year, sales were 5.3 percent above the same period in 1957. Twenty-nine of the 44 markets reported sales higher than last year. In 2 markets, sales were about the same but in 13 markets cumulative sales were lower. The average milkfat test of skim products during February which averaged 1.05 percent was the same as for both February of last year and January of this year.

February sales of half-and-half above last year

Average daily sales of milk and cream mixtures (half-and-half in most markets) in 43 Federal Order markets (Worcester, Mass. excluded) were 2.5 percent above February 1957 and 0.9 percent above January 1958. Sales were higher in 32 markets with 7 markets showing increases of at least 20 percent. Sales were lower in 11 markets. Compared with January, sales were higher in 29 markets, about the same in 5 markets, but lower in 9 markets. Total sales for the months of January and February 1958 combined averaged 2.0 percent above the same period last year. The average milkfat test of sales of half-and-half during February was 11.8 percent. This was the same average as February 1957 and compares with 11.9 percent in January.

Sales of fluid cream during February continue substantially below last year

Average daily sales of fluid cream in 39 of the 44 Federal Order markets (5 Mass. markets excluded) were 9.0 percent less than February 1957 and 0.4 percent below January of this year. Twenty-seven markets reported decreases from February of last year with 13 showing decreases of at least 10 percent. Sales were higher in 12 markets. Compared with January sales were higher in 24 markets and about the same in 4 markets. Lower sales were reported in 11 markets. Among the larger of these markets, Philadelphia decreased 4 percent; Cleveland, 2 percent; and Chicago, 3 percent. Cumulatively for the first 2 months of the year sales of fluid cream were 8.0 percent less than for the same period in 1957. Thirty markets reported sales at a lower level. In two markets sales were about the same but in 7 markets sales were higher than for January-February 1957.

Total fluid product sales above last year

In the 39 markets which have in-area sales data for all fluid products, total sales in product pounds during February were 1.6 percent above February 1957. Sales in terms of milkfat were 0.8 percent higher. The average milkfat test of all fluid products during February was 3.74 percent, as compared with 3.77 percent in February 1957. Receipts of milk from producers in this group of markets during February were 0.9 percent higher than the same month the previous year. Cumulative sales of all products in total pounds for January and February were 1.9 percent higher than the same period last year. Total pounds of milkfat were 1.0 percent greater.

Receipts continue upward during March

Receipts of whole milk from producers at 64 Federal Order markets during March averaged 70.4 million pounds per day. This was 1.2 percent higher than for the same group of markets in March of last year and 3.0 percent above February. Of this group of markets, 30 reported higher receipts than last year, 2 reported receipts at about the same level, and 32 reported lower receipts. Receipts per producer in the 64 markets averaged 542 pounds per day as compared with 518 pounds in March last year and 523 pounds in February this year. This was 4.6 percent above March a year earlier. Receipts per producer were higher in 45 of the 64 markets. In 1 market receipts per producer averaged about the same but in 18 markets they were lower. The average milkfat test of receipts during March was 3.71 percent compared with 3.72 percent in March of last year and 3.76 percent in February this year.

Milk production in April about the same as last year

Milk cows on farms in the United States produced a total of 11.4 billion pounds of milk during April - practically the same amount as in April of last year but 8 percent more than the 1947-56 average for the month. Production made about the same seasonal increase from March to April as last year, but the seasonal gain was smaller than usual. Per capita production at 2.19 pounds per person was 2 percent lower than last year and 4 percent less than average for April. In the first 4 months of the year milk production totaled 41.6 billion pounds compared with 41.5 billion pounds in the same period last year.

FLUID MILK AND CREAM REPORT
JUNE 1958

Early June fluid milk prices in about 160 important markets throughout the United States were steady to slightly lower than a month earlier, the Agricultural Marketing Service reported today. Producer prices were substantially lower in 4 markets or about 1 in every 40 markets. Single quart home delivery prices were lower in 7 markets or about 1 in every 23 markets. However, Class I prices in a number of markets have not yet been determined for June. Further changes in June producer prices may be shown in the report next month.

The average price per single quart of milk delivered to homes in 25 major cities was 25.0 cents. This was unchanged from May but 0.7 cent higher than in June 1957. Compared with the May 1952-56 average, this month was 2.2 cents per quart higher. A price decline of 1 cent per quart from May was reported for New Orleans. Compared with June of last year, prices were higher in a number of the 25 markets. In Hartford, Milwaukee, and Washington, D. C. the single quart price was up $\frac{1}{2}$ cent per quart. Pittsburgh, Cleveland, Louisville, Dallas, Salt Lake City, and San Francisco each reported the single quart price 1 cent per quart above a year earlier. In Philadelphia and Los Angeles, the price was $1\frac{1}{2}$ cents per quart higher and in New York City, Minneapolis, Baltimore, and Jacksonville the gain was 2 cents per quart. Kansas City and Seattle reported the single quart price 1 cent below a year earlier.

Dealers' buying prices for milk for fluid use in about 160 markets in the United States averaged \$5.10 per hundredweight in early June. This was 2 cents less than May and 6 cents below June of last year. In 6 of the 9 regions, Class I prices in major markets averaged less than May 1958 with decreases ranging from 1 cent per hundredweight in the Mountain States to 9 cents in the West South Central. In the South Atlantic and Pacific regions, the average was about the same, but in the New England States it was 1 cent higher.

In the New England region, the average Class I price in early June was \$5.55 per hundredweight. This was 1 cent per hundredweight above May, but 16 cents below June of last year. There were no substantial changes in producer or resale prices reported for any of the major markets in this region.

(Continued on page 14)

S Where State is marked "S", all cities are under State Control Board.

S** Producer price only under State Control.

F Where State is marked "F", all cities shown are under Federal Order.

D.R. Payment is in direct ratio to milkfat content.

a. Class or base price unless otherwise noted. Bulk tank premiums appear in table 4 page 12.

b. List prices subject to discounts. d. May price; at Manchester, \$2.74.

e. NEW YORK-NEW JERSEY: 200-mile zone price plus estimated freight (31½¢-41¢) and country station handling charges (20-50¢); CHICAGO: 55-70 mile zone; NEW ORLEANS: 61-70 mile zone. f. Flat price.

g. Negotiated prices. The F.O.M. prices shown in table 1(a).

h. Includes following service charge for first unit only each single delivery:

BUFFALO, LOS ANGELES, 5¢; FRESNO and SAN FRANCISCO, 3¢; SACRAMENTO, 4¢.

j. Includes an average 39.5¢ per cwt. quality premium. (Applies to May price; not as shown last month).

k. Second half-gallon: Boston, 46¢, Fall River, 6-8¢ less; Springfield, 39-44¢; Worcester, 42¢;

Alton, 39¢, Green Bay, 36¢. m. In paper container. n. Creamline or regular.

p. Prices for April and May same as for June instead of as shown. Several individual handlers paying premiums. r. The most common grade of milk not reported; prices shown are for Homogenized Vitamin D milk.

s. Minimum basic Class I price. Producers have option of Louisville blend price or base price.

t. Homogenized. u. Effective May 1. v. April and May prices 27¢ not 26½¢. w. In glass.

x. F. O. M. price. y. Negotiated price for April averaged \$5.78 instead of price shown.

z. April Cl. I negotiated \$4.31 not \$4.38 at Detroit; May Cl. I negotiated \$3.82 not \$3.92 at Rock Island.

A. May prices same as June/ B. Est. avg. Cl. I price paid by handlers. Actual avg. Apr., May \$5.54.
(also Apr. at Phila.).

Table 2.--Dealers' average buying prices for milk for fluid milk use (f.o.b. city) United States, by regions, June 1958 ^{1/}
(Per hundredweight - 3.5% fat; weighted by population of individual markets).

^{1/} "Standard grade" is grade commonly sold in each market. Grades vary between markets due to differences in determining factors. The prices shown are the latest reported up to and including the 10th of the month.

^{2/} In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase. ^{3/} Revised

3/ In paper.

In the Middle Atlantic States, dealers' buying prices for Class I milk in early June averaged \$5.67 per hundredweight -- 2 cents per hundredweight below May, and 5 cents less than June 1957. The New York-New Jersey marketing area reported Class I prices 3 cents lower than May. There were no changes reported in single quart home delivery prices for markets in this area.

In the East North Central region, the average price for milk for fluid use paid by handlers in early June was \$4.03 per hundredweight. This was 3 cents per hundredweight less than May and 16 cents less than June a year earlier. The Chicago, Ill. marketing area and a number of nearby markets showed a decrease of 5 cents per hundredweight for Class I milk, but no changes in retail prices. Battle Creek, Mich. reported a 30-cent decline in Class I prices. Retail prices were 2 cents per quart lower for milk sold both to homes and in stores in this market. Kalamazoo prices were lower by 24 cents per hundredweight for Class I milk and 1 cent per quart for home delivery. The single quart price in stores in this market was unchanged.

In the West North Central area, Class I prices to producers, averaging \$3.93 per hundredweight in early June were 5 cents per hundredweight less than the previous month, and 12 cents below the same month a year earlier. Small declines in the Class I price in a number of markets were reported in this region, the most important of which was an 8 cents per hundredweight decrease in St. Louis, Mo. Retail prices in this group of markets stayed unchanged from May. In the Des Moines, Ia. market reported prices were 17 cents per hundredweight below May for Class I milk, but unchanged at homes and stores. In Aberdeen, S. D. the Class I price was 6 cents per hundredweight lower, and the price for milk retailed to homes and out of stores 1 cent per quart below May. The Class I price in the Topeka, Kans. market was virtually unchanged, but 1 cent per quart lower for both home delivery and store purchases. In Wichita, Kans. the Class I price was 6 cents per hundredweight less than May. Home delivery prices were 4 cents per quart lower for paper deliveries and from 1 to 2 cents lower for milk sold in paper out of stores. Prices for milk sold in half gallon and gallon containers in Topeka, Wichita, and in nearby Kansas City were quite unstable in early June as price war conditions were reported.

In the South Atlantic region, the dealers' buying price for Class I milk in early June was \$6.19 per hundredweight. This was unchanged from last month, but 1 cent per hundredweight higher than June last year. No important changes were reported in either Class I or home and store prices in major markets in this area.

In the East South Central region, the average Class I price was \$4.95 per hundredweight in early June - 2 cents less than May, and 5 cents less than June 1957. Among the principal markets the only change was in Lexington, Ky. where Class I and home delivery prices were unchanged but store sales were 1 cent per single quart lower than May.

In the West South Central area, prices paid by dealers for Class I milk in early June were \$5.36 per hundredweight. This was 9 cents per hundredweight less than May, but 4 cents above June a year earlier. New Orleans, La. reported a Class I price drop of 38 cents per hundredweight from May and prices at homes and stores, 1 cent per quart less. In Tulsa, Okla. and Austin, Tex., the Class I price was 10 cents per hundredweight lower. Prices at homes and stores in these markets were reported unchanged.

In the Mountain States, the average Class I price at \$5.67 per hundredweight in early June was 1 cent less than May and 6 cents below June 1957. The Central Arizona marketing area reported Class I prices at 9 cents per hundredweight less than May. Consumer prices in Phoenix and Tucson markets were reported unchanged.

Among the Pacific Coast States, the Class I price in early June averaged \$5.02 per hundredweight. This was about the same as May, but 4 cents per hundredweight less than June of last year. The Spokane, Wash. market reported an 8 cent per hundredweight decline in the Class I price and home and store prices 1 cent per quart lower. Los Angeles, Calif. prices were reported unchanged for both Class I milk and home delivery but store prices were one-half cent per quart higher.

1/ Prices usually specified as follows:

Class I - Milk for fluid consumption.

Class II - Milk from which cream is obtained
for fluid consumption.

Class III - Milk used in manufactured dairy
and IV products.

2/ F. O. B. CITY unless indicated otherwise.

3/ Minus 30¢ per cwt. deducted for fall production
fund. Includes 39.5¢ per cwt. average quality
premium (applies to April price not as shown
last month).

4/ Base price; surplus price \$2.59.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
MARKETING AREAS UNDER FEDERAL ORDERS, MARCH AND APRIL, 1958

In 39 Federal Order markets which have in-area sales data comparisons for all fluid products, sales during March 1958 were 0.2 percent less than March 1957, the Agricultural Marketing Service reports. Sales of milkfat in these products were 1.1 percent less than March last year. The average milkfat test of all fluid products sold during March was 3.74 percent as compared with 3.77 percent in March of last year. Cumulative daily sales of all products in total pounds for January through March were 1.0 percent higher than for the same period in 1957. Cumulative sales of milkfat in all products for the same group of markets were 0.2 percent greater. For the 44 markets for which sales data are available by individual product groupings, average daily sales of whole milk during March were slightly less than a year earlier; skim milk sales averaged 3.2 percent higher. Milk and cream mixtures sales were slightly higher, but fluid cream items showed sales substantially below March 1957.

Whole milk sales decline from both month earlier and year earlier

Average daily sales of whole milk in 44 Federal Order markets during March were 0.5 percent less than March 1957 and 1.5 percent below February 1958. Of the 44 markets for which sales have been segregated to exclude out-of-area sales, only 16 reported increased sales over March 1957. In 6 markets, sales were about the same, but in 22, sales were lower. Of the 9 markets with sales of 1 million pounds or more per day, all but 2 showed decreases with 4 showing 1 percent declines and the other 3 showing 2 percent declines. Cumulative daily sales in the first 3 months of 1958 for the entire group of markets averaged 0.8 percent higher than in the same period in 1957. Cumulative sales were higher in 25 of the 44 markets, about the same in 11, and lower in 8. The average milkfat test of whole milk sales in 39 of the 44 markets (all Mass. markets excluded) was 3.56 percent in March 1958. This may be compared with 3.57 percent for both March of last year and February of this year.

Sales of skim milk increase 3.2 percent from a year earlier

Average daily sales of fluid skim products for the entire group of 44 markets during March were 3.2 percent higher than March of last year but 0.3 percent below the previous month. Compared with last year, sales were higher in 26 of the 44 markets, about the same in 2, but lower in 16. Of the 7 markets having sales above 100 thousand pounds daily, three showed increases above March of last year, but in 4 declines occurred. Cumulative daily sales of skim milk in the 44 markets for the first 3 months of the year averaged 4.5 percent higher than for the similar period last year. The average milkfat test of skim products during March was 1.05 percent, unchanged from February, but slightly above the 1.03 percent average for March of last year.

Sales of half-and-half slightly higher than last year

Average daily sales of milk and cream mixtures (in most markets known as half-and-half) in 43 Federal Order markets (Worcester, Mass. excluded) were 0.9 percent higher than March last year. Sales were lower than February by 1.4 percent. Higher sales than March a year earlier were reported in 28 of

the 43 markets. Sales were about the same in 1, but lower in 14 markets. Cumulative daily sales in the 43 markets during the period January-March 1958 were 1.6 percent higher than for the same period in 1957. In 4 of these markets, first quarter sales were about the same as in 1957 with 27 showing increases, of which 9 showed at least 10 percent. Sales were about the same in 4 markets, but lower in 9. The average milkfat test of milk and cream mixtures during March was 11.8 percent, the same percent as March last year and February of this year.

Fluid cream sales during March continue substantially below last year

Average daily sales of fluid cream in 39 of the 44 Federal Order markets (5 Mass. markets excluded) were 9.9 percent below March of last year, and 1.1 percent below February. Thirty-three of the 39 markets reported decreases with 10 showing lower sales than last year by as much as 15 percent. Sales were about the same in 1, and higher in 5 markets. Compared with February, March 1958 sales were lower in 24 of the 39 markets, about the same in 4, and higher in 11. Cumulative daily sales in the 39 markets for the first 3 months of this year were 8.6 percent below the same period last year. Twelve of the 39 markets showed decreases of as much as 10 percent. Milkfat test of sales for this group of markets averaged 22.5 percent in March as compared with the same percentage of March last year but 22.4 percent for February this year.

April milk receipts continue upward

Receipts of whole milk from producers at 64 Federal Order markets in April averaged 73.7 million pounds per day -- 2.6 percent higher than April last year and 4.6 percent higher than March. Thirty-three of the 64 markets reported higher receipts, with 15 markets having increases as high as 10 percent. In 2 markets, receipts were about the same as April a year earlier, but in 29 markets receipts were lower.

Average receipts per producer at 571 pounds per day, were 5.7 percent higher than April of last year. Receipts per producer were higher in 52 of the 64 markets, about the same in 2, but in 10 were lower. The average milkfat test of receipts during April was 3.66 percent. This may be compared with 3.68 percent in April of last year, and 3.71 percent in March 1958.

Production of milk during May below last year

Milk production on farms in the United States during May was 12.9 billion pounds -- 1 percent less than May of last year, but 4 percent higher than the May 1947-56 average. This was the first time since May 1956 that current monthly production has failed to exceed the corresponding month of the previous year on a daily production basis. Output in May increased 13 percent seasonally as compared with 14 percent from April to May last year and the average seasonal gain of 17 percent. Per capita milk production was 2.40 pounds per person -- 2 percent less than in May last year and 7 percent below the May 10-year average. Production of milk for the first 5 months of 1958, at 54.5 billion pounds was only slightly more than for the same period in 1957.
